

EdgeIPS™ 103

Next-Generation IPS Series

Transparent Security Box Protects Mission-Critical Machines & Supports Continuous Production Line Operation

Changing the infrastructure of security countermeasure deployment is a painful process requiring costly investment, especially in an air-gapped network environment connected with a massive number of assets that were not designed for the modern corporate network.

EdgeIPS 103 ensures the security of individual assets and small production zones through hassle-free transparent deployment to provide OT visibility and OT protocol filtering with the option of inline or offline functionality. This security solution is designed specifically to fit into your network without disturbing your existing configurations.

EdgeIPS 103 creates visibility and rock-solid cyber defense for legacy systems and unpatched devices, in addition to the configurable hardware bypass, all of which make up the backbone of your production line to ensure uninterrupted operation.

Benefits

Minimize Time Spent on Configuration & Management

- Easy on-site deployment that seamlessly integrates with your existing network.
- Works independently and effectively and can be centrally managed by EdgeOne™.
- Supports hardware failover setup to minimize downtime during patching or maintenance.

Effortless Network Segmentation with Auto Rule Learning

- Creates L3 and L2 baseline policies based on traffic behavior learned in the OT environment.
- Supports multiple ICS protocols to secure OT network communication.
- Shields vulnerable unpatched devices with signature-based virtual patching.

OT-native Hardware Designed to Keep Operations Running

- Equipped with the configurable hardware bypass feature for high availability.
- Built with durable, industrial-grade components for harsh environments and temperatures.
- Redundant power design for OT environments.

Boost the Visibility of Your Mission-critical Assets

- Supports passive discovery methods and IT/OT traffic communication monitoring for asset visibility.
- Supports flexible search filters to quickly locate specific assets.
- Built-in log viewer for tracing daily events and monitoring traffic.

Single line

Key Features

- Transparent Network Traffic Control**
 EdgeIPS 103, specifically designed for levels 1-3, can be deployed in front of mission-critical assets or at the OT network edge. Its transparency and high performance allow for detection of network traffic and production assets without disrupting operations.
- OT-Aware Operational Intelligence**
 Our core technology for EdgeIPS 103, TXOne One-Pass DPI for Industry (TXODI™), gives you the ability to create and edit allowlists, enabling interoperability between key nodes and deep analysis of L2-L7 network traffic.
- Flexible Operation Modes, 'Monitor' & 'Prevention'**
 EdgeIPS 103 can flexibly switch between 'Monitor' and 'Prevention' modes. Keep in 'Monitor' mode until the detection results are verified by the IT or OT team, then switch to 'Prevention' mode to block malicious traffic.
- Shadow OT Visibility Enhancement**
 EdgeIPS 103 comes equipped to make your IT and OT networks as integrated and coordinated with each other as possible, and to grant visibility of your shadow OT environment.
- Signature-Based Virtual Patching**
 With the cutting-edge research of the Zero Day Initiative (ZDI) vulnerability rewards program, EdgeIPS 103 offers you superior control of the patching process for legacy systems to protect them against known threats through virtual patching.
- Auto Rule Learning Technology**
 EdgeIPS 103 is equipped with Auto Rule Learning technology, the OT-native machine learning customized to ICS network behavior, to create baseline allowlists for simplifying the administration process.
- Wide Range of Industrial Protocols**
 EdgeIPS 103 supports a variety of OT protocols, including Modbus, SECS/GEMS, CIP, and more, to allow OT and IT security administrators to collaborate for seamless operation within the existing network architecture.
- Centralized Management with Convenient, Consolidated Overview**
 Pattern updates and firmware management can all be centralized on a large scale. For facilities with massive EdgeIPS 103 nodes, EdgeOne™ helps administer and manage them by group, reducing costs and increasing large-scale efficiency.

EdgeIPS™ 103 Specifications

| Feature | EdgeIPS 103 |
|---|---|
| Threat Prevention Throughput* | 850Mbps at least (IMIX) / 1.2Gbps+ (UDP 1518 bytes) |
| Latency* | <500 microseconds |
| Concurrent Connection (TCP) | 30,000 |
| Supported ICS Protocol | Modbus / IEC 104 / CIP / S7Comm, with more being added regularly |
| Policy Enforcement Rules | 512 Rules |
| L2 Policy Enforcement Rules | 256 Rules |
| ICS Protocol Filter Profiles | 32 Profiles |
| Form Factor | DIN-rail mounting and wall mounting (with optional kit) |
| Weight (Standalone Device) | 933g (2.0569 lbs) |
| Dimensions (W x D x H) | 40.2mm x 109.8mm x 140.1mm (1.582 x 4.322 x 5.515 in) |
| Network Interface Type | 3 x Auto-sensing 10/100/1000 Mbps ports (RJ45 connector) |
| USB Interface | 1 x USB v2.0 Type-A |
| Management Interface (Web Console) | Out of band interface, 1 x Auto-sensing 10/100/1000 Mbps ports (RJ45 connector) |
| Hardware Fail-over | Configurable hardware bypass |
| Management Console interface | USB Type-C Console |
| Input Voltage | 12/24/48 VDC Terminal block / DC-IN 12V |
| Input Current | 0.483/0.241/0.127 A |
| Power Supply | Dual-Type input (4-pin terminal block, V+, V-) / DC-IN 12V |
| Operating Temperature | -40 to 75°C (-40 to 167 °F) (Wide Temperature) |
| Ambient Relative Humidity | 5 to 95% non-condensing |
| Non-Operating / Storage Temp | -40 to 75 °C (-40 to 167 °F) |
| Non-Operating / Storage Relative Humidity | 5 to 95% non-condensing |
| Vibration | IEC60068-2-6 (without any USB devices attached) |
| Mean Time Between Failure (MTBF) | 700,000 hours + |
| Safety Certification | CE, UL, UL 60950-1 |
| Electromagnetic Compatibility | EMI: CISPR 32, FCC Part 15B Class A; EMC: EN 55032/35, VCCI Class B |
| Green Product | RoHS, RoHS2, CRoHS, WEEE |

* Note: Performance is measured in a laboratory; performance values may vary according to test conditions and system configuration.
 ● Each EdgeIPS is entitled to 2 years hardware warranty. Upon renewal of the software license, the hardware warranty WILL NOT be extended for the same renewal period, subject to a maximum warranty period of 5 years for the hardware.
