

## ENVIRONMENTAL POLICY of M.A.C. SOLUTIONS UK Ltd.

M.A.C. Solutions (UK) Ltd. (The Company) is a non-producing provider of products and services to the Industrial Communications market.

Products are neither manufactured nor assembled on the Company premises and therefore activities are limited to the receiving and the despatching of goods and the safe disposal of W.E.E.E materials returned to the Company by its Customers..

Nonetheless, The Company is dedicated to ensuring that its carbon footprint is as near to neutral as possible by the framing and enforcement of this Environmental Policy thereby ensuring that the Company's Green Credentials are managed and maintained in keeping with the best recommended practices.

The Principles applied through this policy are:-

- The Company advises it's customers of it's WEEE Materials Disposal Policy and has a commercial relationship with a certified recycling agency, "ValPack" to ensure that returning WEEE materials are collected and recycled in keeping with the regulations
- The Company minimises the production of waste with a continuous improvement programme for it's operations to ensure they are as efficient as possible.
- The company actively promotes the core principles of recycling throughout the organisation.
- Unavoidable packing waste that is generated during operations is collected, stored and disposed of in line with statutory requirements
- The Company does not have a vehicle fleet but employees using their own vehicles on Company Business are encouraged to use vehicle sharing to minimise toxic emissions.
- The company offers free electricity for employee's electric vehicles at MAC office locations.
- The Company actively seeks suppliers of products and services that have good green credentials.

In conclusion the Company strives to meet or exceed all the environmental legislation that relates to the company.
