

## Press Release

Nivelles, September 12, 2017

# eWON<sup>®</sup> Talk2M is ISECOM STAR Security Certified

**HMS Industrial Networks today announced that their remote connectivity solution, eWON Talk2M is now ISECOM STAR security certified.**

The eWON Talk2M remote connectivity service is a key element in the eWON remote solutions from HMS Industrial Networks. Talk2M offers users a secure remote connection to industrial equipment via eWON industrial routers. Accordingly, Talk2M is regularly tested by independent companies to maintain a high security level in today's fast-evolving technology environment.

HMS now announces that Talk2M has become ISECOM STAR certified after passing an assessment performed by the company admeritia GmbH, a vendor-independent German cybersecurity company specialized in IT Security assessment (ethical hacking) and KPI-based security measurement. The assessment was done through an OSSTMM 3.0 and OWASP audit process which included penetration tests of Talk2M targeting the cloud based infrastructure.

eWON solutions Security Manager Geoffrey Gobert comments: "The assessment was performed through a number of tests from the perspective of a malicious actor, and we got a snapshot of the overall security posture of the eWON Talk2M remote connectivity service. We are very satisfied to have successfully passed the ISECOM STAR security certification, and are committed to continue with regular security assessments to ensure that we provide secure connectivity for our customers. We always aim to identify any technical risk can translate into business risk."
